Global demand to keep UPL's sales growth trajectory strong

Despite rising debt and margin pressures, the company has maintained its FY22 guidance

RAM PRASAD SAHU
Mumbai, 1 November

The September quarter (Q2) results of India's largest crop protection company, UPL, were largely in line with brokerage estimates, barring the pressure on gross margins and rise in debt.

These two factors led to a downward revision of earnings estimates for financial year 2021-22 (FY22), leading to a 2 per cent decline in the stock price.

In a tough environment, the company posted better-than-expected revenue growth with most markets seeing double-digit growth. Sales growth in Latin America, its largest market, was a robust 20 per cent, led by both higher volumes and realisations in Brazil, which was up 27 per cent. Growth in North America and Europe, too, were strong at 24-31 per cent.

The company indicated positive triggers for the North American market, including improved commodity prices, tight supply for key products and favourable channel stocks. India was the only disappointment, registering a growth of 5 per cent year-on-year (YoY) on muted demand due to erratic rainfall.

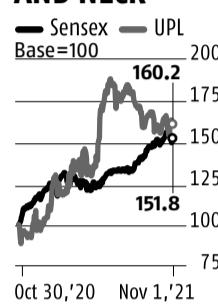

ROBUST SALES GROWTH IN Q2

All figures in %

	Sales (₹ crore)	Sales growth YoY	Gross profit margin	Operating profit margin
Q1FY21	7,833	-0.9	54.7	22.7
Q2	8,939	14.4	49.6	20.2
Q3	9,126	2.6	54.9	24.2
Q4	12,796	14.9	45.9	22.2
Q1FY22	8,515	8.7	56.5	21.9
Q2	10,567	18.2	50.6	19.4

Source: Motilal Oswal Research

GOING NECK AND NECK

YoY, while sequentially it was down 592 bps to 50.6 per cent.

Gains over the year-ago period were on account of improved product mix with higher share of differentiated products and improvement in pricing environment, but sequential compression was because the full impact of the price hikes was not reflected in the quarter. This will get passed on to the March quarter.

An area of concern is the increase in debt — gross debt rose from ₹23,770 crore in FY21 to ₹27,150 crore due to the increase in short-term borrowings.

Analysts point out that this was on account of seasonal increase in working capital in the first half of FY22, with the net working capital days increasing by 8 to 114. Kotak Institutional Equities believes higher working capital days as well as raw material inflation would drive higher working capital investments this year, limiting free cash flows.

The company has, however, maintained its FY22 guidance targets related to debt as well as growth. It continues to guide for a net debt to operating profit of less than 2 times, while revenue and operating profit growth (on the back of strong global demand) would be in the 7-10 per cent and 12-15 per cent bands. Given the Q2FY22 performance, analysts at Motilal Oswal Research have cut their FY22 earnings estimates by 4 per cent.

However, there was pressure on gross margins because of higher raw material costs and inferior geographic mix. Gains on the gross margin front were limited to 100 basis points (bps). Given the Q2FY22 performance, analysts at Motilal Oswal Research have cut their FY22 earnings estimates by 4 per cent. At the current price, the stock is trading at 11.7 times its FY23 earnings estimate. While prospects are robust, any increase in debt and pressure on margins would impact the stock.

Sebi bans Proficient Research, its partners from markets for 4 years

Sebi has constituted IT Projects Advisory Committee that will advise the markets regulator on projects aimed to utilise advanced technologies such as AI, machine learning, data analytics and cloud computing. The seven-member committee, headed by Abhay Karandikar, a director at IIT Kanpur, will provide guidance to upgrade existing Sebi's IT systems and solutions with the latest IT practices, techniques.

tools and technologies, an update available with the regulator showed. It will provide technical expertise to Sebi in various stages of IT solution procurement as members of the Tender Evaluation Committee. Besides, it will provide technical insights during the implementation of the project, including user acceptance, final acceptance, and warranty initiation.

PTI

Markets regulator Sebi on Monday restrained Proficient Research and its partners from accessing capital markets for four years for engaging in investment advisory services without obtaining requisite registration. Such certification is mandatory under Investment Advisers Regulations, 2013. Partners of partnership firm Proficient Research were Vidhi Singh Parikh, Mohd. Sohail Khan and Altamash Sheikh. No directions have been passed against Khan since he was a partner for only two months and then resigned with effect from September 1, 2014. Proficient Research had collected approximately ₹48 lakh in the name of advisory fees during July 2014 to November 2016. PTI

Strong Q2FY22 volume growth of 15 per cent indicates UPL's supply-chain capability and ability to benefit from the ongoing disruption."

However, there was pressure on gross margins because of higher raw material costs and inferior geographic mix. Gains on the gross margin front were limited to 100 basis points (bps).

Say Ritesh Gupta and Prasenjit Bhuiya of Kotak Institutional Equities,
